SURAJ MORE

Frontend Developer – 4 Years Experienced

surekant13997@gmail.com
+91 9309751507

EDUCATION

Prof. Ram Meghe Institute of Technology & Research Badnera
B. E. (Computer Science & Engineering) 2015 — 2019

CORE COMPETENCIES

- Frontend Development
- UI/UX Design
- Performance Optimization
- API Integration

TECHNICAL SKILLS & TOOLS

- React.js
- JavaScritp(ES6+)
- NextJs
- HTML5,
- Animating React Apps
- CSS3, Tailwind CSS
- Redux(State Manaement)
- Material UI
- Responsive design principles
- Debugging
- Deploying React Apps
- Visual Studio, IntelliJ Idea
- Postman (API Testing)
- GIT

AWARDS & HIGHLIGHTS

✧ **INSTA AWARD (Infosys)**
Received for exceptional project delivery and outstanding performance in BTTS application.

✧ **Gracious Platform Recognition (Infosys)**
Appreciated for client satisfaction and teamwork contribution.

CERTIFICATIONS

- AWS Cloud Practitioner
- Azure 900

PROFILE SUMMARY

- Results-driven **Frontend Developer** with **4 years of experience** in building scalable and performant web applications. Skilled in **React.js, JavaScript, Material-UI, Tailwind CSS, Redux, HTML5, and CSS3**, with a strong focus on creating **clean UI, responsive designs, and maintainable architecture**. Adept at **state management, API integration, and cross-functional collaboration** with backend and design teams.
- Proven ability to deliver **high-quality code under tight deadlines**, with recognition for **exceptional project delivery (Insta Award)** and **client satisfaction (Gracias platform)** at Infosys. Experienced in **modernizing legacy systems**, developing **data-intensive tools**, and optimizing performance using techniques like **Web Workers** for large-scale data processing.
- Passionate about **continuous learning, problem-solving, and delivering user-centric solutions**, with a track record of enhancing **application performance, accessibility, and user experience**.

WORK EXPERIENCE

FRONTEND DEVELOPER
INFOSYS: May 2022 - Present

- Modernizing legacy **Citrix-based internal tools by converting them into web applications** to improve performance, accessibility, and user experience.
- **Migrated tools:** Analytical Source Tool (data sourcing/analysis), Tabling Tool (table configuration & automated generation), Data Validation Tool (ensures accuracy & integrity).
- Built responsive, modular UI using React.js and Material-UI.
- Designed dynamic components like tab views, modals and collapsible menus.
- **Integrated secure REST APIs** and implemented Redux for global state management.
- Focused on accessibility and responsiveness across devices.
- **Configured and deployed frontend applications on Nginx server**, setting up reverse proxy, SSL termination, and caching policies to improve performance and scalability.
- Deployed backend Java applications on Apache Tomcat within Azure App Services, integrating with Azure DevOps CI/CD pipelines and optimizing JVM parameters to ensure secure, stable, and high- availability API services.

PROJECTS

✧ **WebApp Migration – Citrix Tools to Web Applications (Ongoing)**

Modernizing legacy Citrix-based internal tools into modern web applications for improved performance, accessibility, and user experience.
Migrated tools include:

- **Analytical Source Tool** – for data sourcing and analysis.
- **Tabling Tool** – modules for table configuration and automated table generation.
- **Data Validation Tool** – ensures accuracy and integrity of processed data.
- **PDT (Product Definition Tool)** - Bug Fixes.
- **FIFO (Force In Force Out)** - Bug Fixes
- **Migration Viewer** - Bug Fixes

✧ **Bench Tracking Tool System (BTTS)**

- Designed and implemented a **responsive, modular UI** using React.js and Material-UI.
- Built dynamic components such as **tab views, modals, and collapsible menus**.
- Focused on **accessibility and responsiveness** across devices.
- Integrated secure REST APIs and implemented **Redux** for global state management.

✧ **FILE COMPARISON TOOL (CSV Comparator)**

- Developed a **high-performance CSV comparator** capable of handling millions of rows.
- Leveraged **Web Workers** for background processing to ensure a non-blocking UI.
- Implemented a **clean diff view** with sorting, filtering, and downloadable reports.
- Utilized **React.js, JavaScript, HTML5, custom hooks, and CSV parsing techniques**.
